DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Saito et al. US 6,436,567.

3. This patent is directed to fuel cell separators that can be formulated from the claimed polymers, see column 3 lines 20+. The graphite is shown in the examples. It would be obvious to select the claimed polymers from those listed given the clear suggestion in the art to do so. In view of this disclosure, the claims are obvious.
